Asteroid and Blowback

Split CD

7 320470 067161 >

Fuzzorama records beautiful and eagerly awaited split album of year 2006. This is a split record between the two heavy grooving bands Asteroid and Blowback.

Asteroid is a band that has already made themselves a name over the world with their heavy, progressive, 70's inspired rock. A groove that is impossible to resist and unforgettable melodies mixed with huge riffs.

Blowback always hits the bull's eye with their mix of 70's rock and fuzz rock. When this band turn their amps on you will be nailed against the speaker begging for more. Here you got riff-o-mania that no one is safe from.

Both bands have released self produced material over the years with great reviews in both trade press and music magazines all over the world. We at Fuzzorama records have been watching these guys for a while and have been waiting for them to mature and find their own sound. One day this autumn we realized that this is too damn good to be ignored any longer. After we had seen both bands live we just had to do something with them. There was no question about it; this has to be on a Fuzzorama record! We think that we manage to capture the raw and dirty live nerve from both of the bands on this record. These are incredibly good songs, not only are they beautiful and fragile, they also have great melodies with a groove, heaviness and dynamics that are awesome! Everything points to that this could be the record of year 2006; "Asteroid and Blowback" (FuzzCD005)
