"II"

The history of Asteroid is a psychedelic space saga, timeless and endless, with no upside or downside, but with a beautiful ending. The band, formed during the winter of 2003, have undertaken a long musical journey and developed a sound well fit to the trio constellation. After being formed as a regular stoner band, it didn't take long before new grounds were conquered. Since then, influences have been collected from blues and British 70's classic rock, but also from Swedish traditional folk music.

Asteroid is now back with their second album, called simply "II". It is a more evolved but also relaxed and groovy follow up to their highly acclaimed debut album S/T.

This time they locked themselves up in a studio deep in the forest, trying to capture the raw and naked sound and feeling in their music. You will hear a tighter, heavier, but also darker Asteroid. You will still recognize the characteristic energy in the sound and feel the joy delivered by the musicians.

This record is like transporting yourself back to the psychedelic woods of Sweden, but unlike other 70's influences bands this is also fresh and unique on its own.

Asteroid is today a well-known live act all over Europe with constant touring and a reputation of wild and sweaty live shows. Hold on to your hats! ASTEROID IS BACK!

**The album is distributed in Europe by PHD
Germany and Benelux by Roughtrade.**

1. Garden (4,28)
2. Disappear (5,29)
3. Karma (5,34)
4. Edge (3,46)
5. river (3,53)
6. Lady (4,21)
7. towers (5,43)
8. Fire (5,17)
9. Time (6,11)
